

8345 Understanding the ISO Rating System

In an effort to keep communities informed and up-to-date on how the Public Protection Class (PPC) rating system is evaluated, several free one-day workshops are being held across the state. These workshops will explain, in detail, the current Fire Suppression Rating Schedule composed of the Fire, Water, Communications, and Community Risk sections.

Who should attend? These workshops are open to key stakeholders who provide community fire protection such as personnel from a fire department, communications center, water department, and/or community officials. Presenters will be from ISO. This workshop is an excellent opportunity to have any questions answered as you prepare for your next evaluation.
